COMPENG 2SH4 Project – Statement of Contribution

Your Group Name   team

Your Name   Kun Xing

Your Team Member's Name   Ibtisam Alhasoon

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

    Completed iterations 1b and 2b, as well as the features of iteration 3 which check snake food consumption and snake body growth as well as the snake death check. Additionally, I added the comments to most of the code and worked on debugging the memory leak issues.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

    My partner did everything else that wasn't covered which includes iterations 1a and 2a and the snake movement for iteration 3. Additionally, my partner did the bonus and general debugging.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

    I think that this project moved smoothly. As a group, we would work on separate branches, each covering our own part until we were sure that our parts worked as we did not want to push unworking code to main. Once we confirmed that our code worked, we merged our branches with the main code.
